

EXECUTIVE PROTECTION

Craig Investigations identifies vulnerabilities and provides tailored programs for executives, witnesses, families and individuals at home or while traveling. Assessments of risk and exposure levels determine the scope and nature of the protection. Craig Investigations will assess any form of potential and actual threat, provide recommendations and implement protective measures such as:

- Bodyguards that are appropriate to the situation and discreetly blend with the client's lifestyle
- Strategic and tactical driving training
- Personal defense training
- Residential security systems including access control, letter and package screening, monitoring of property conditions and screening of visitors and tradesmen.

The modern day bodyguard can no longer simply wear a suit and carry a gun to be active in this highly specialized industry. Since the modern day bodyguard spends a great deal of time with a client, he must carry himself with an air of professional authority, which can only be gained through realistic and thorough training. The modern VIP bodyguard is a security specialist, proficient in all areas related to protection. He must be able to operate as an individual or as part of a high-risk protection team.
