No Matter What You Grow Or Where You Grow It, There's A T-Tape® Product That's Right For You.

Name the crop and chances are that T-TAPE is irrigating it. From strawberries and tomatoes to large fields of cotton and corn, experienced growers around the world have come to depend on the proven performance they get from the world's leading drip tape.

T-TAPE is available in hundreds of different configurations, designed for use in greenhouse, landscape, open field, or permanent crop applications.

***Hook's Point Irrigation will be glad to help you select the diameter, wall thickness, emitter spacing, and flow rate that's right for your unique combination of crop and soil conditions.
Call 1-800-438-2452***

Drip irrigation with T-TAPE offers a long list of benefits including increased crop quality and crop yields, reduced water consumption, energy costs, and crop chemical and fertilizer usage.

T-TAPE DRIP TAPE

Model Mil	Roll Length	Dripper Spacing	GPM per 100'	Max Row Length	Price Per Roll	Price 16+ Rolls
506	10,000	12"	.34	750'	\$185.00	\$175.00
508	7500	4"	1.0	290'	\$160.00	\$150.00
508	7500	6"	.45	550'	\$160.00	\$150.00

508	7500	12"	.22	950'	\$160.00	\$150.00
508	7500	12"	.45	550'	\$160.00	\$150.00
510	7500	8"	.67	450'	\$161.00	\$151.00
515	4100	8"	.50	450'	\$153.00	\$146.00
708	5650'	12"	.22	1368'	\$177.00	\$170.00
708	5650	12"	.34	1200'	\$177.00	\$170.00
508 SR	1500'	12"	.45	550'	\$50.00	

Why so many choices of T-Tape?

In the Midwest we recommend 8 mil tape for use in all vegetable crops, under plastic mulch or along crop row. The heavier the mil the longer life expectancy of the tape. For perennial crops such as strawberries, raspberries and flowers we recommend a 15 mil drip tape.

The flow rate to use is determined by the length of your rows and the amount of water available. The flow rate in column 4 above is gallons per minute per 100' of drip tape. Example: Take the total feet of drip tape in your field, divided by 100, multiplied by the flow rate; $5000' / 100 * .45 = 22.5 \text{ gpm}$. If you only have 11 gpm available you will need to zone your field into 2 sections or irrigate the entire field with a low flow tape at .22 gpm.

Drip tape requires low pressure; only 8 to 15 psi is needed at the drip line. You will need a pressure regulator prior to the drip tape to maintain the lower pressure. A filter is also required with drip tape.

Questions on which size tape is best for your application – please call us at 1-800-438-2452

PLASTIC MULCH

Improve yields, suppress weed growth, reduce soil water loss.

	MIL	ROLL SIZE	PRICE PER ROLL	PALLET PRICE PER ROLL

LAYFLAT HOSE

SF10 layflat hose is recommended for use as the main water line in drip irrigation systems or for transferring water. You can drive over this hose, even when in use. Hose rolls up into a flat coil for storage at end of season.

SF10 Blue Layflat	1" x 300'	110 max psi	\$110.00
	1.5" x 300'	80 psi	\$113.00
	2" x 300'	80 psi	\$125.00
	3" x 300'	80 psi	237.00
	4" x 300'	70 psi	\$320.00
	6" x 300'	60 psi	\$600.00
SF50 Red Layflat	1.5" x 300'	150 psi	\$275.00
	2" x 300'	150 psi	\$330.00
SF70 Black Nitrile	4" x 200'	150 psi	\$1065.00
	6" x 200'	150 psi	\$1570.00

Micro Distribution Tubing .250 x .350	100'	\$20.00	
	500'	\$70.00	

Netafim Streamline is the ultimate thinwall dripperline for seasonal vegetables and row crops. Streamline is available in several emitter spacings, flow rates, 5 to 15 mil wall thickness and 5/8" and 7/8" diameter. Streamline is made with injection molded drippers welding into a seamless wall of tubing.

Netafim Typhoon has an emitter with a wider flow path to reduce clogging. Typhoon is available in 5/8", 7/8", 1 1/8" and 1 3/8" diameter, 8 to 15 mil, 8 to 30 inch emitter spacing and several flow rates.

Drip Net PC uses pressure compensating emitters to deliver precise flow anywhere in the field. Works well in rolling terrain. Drip Net PC comes in 13 to 25 mil, 5/8" and 7/8" diameter, 12 to 36 inch emitter spacing and several flow rates. This is the a good product to use for permanent subsurface irrigation systems.

UniRam PC and Drip Net PC heavy wall drip tape is used for rolling terrains, utilizing pressure compensating emitters for maximum uniformity. Both products are available with vine clips to attached tube to trellis. Both are available in 16mm to 7/8" diameter, 24 to 48 inches emitter spacing, 45 mil wall thickness.

Aries is a non pressure compensating heavywall drip tube. Aries is available in sizes from 1/2" to 3/4", 35 and 45 mil, 24 – 48 inch emitter spacing, and various flow rates.

Thin Wall Drip Lines	Row Length	Mil	Emitter spacing	Price Per Roll
Streamline 630 Series	9000'	8 mil	12" Low Flow	\$330.00
Typhoon 630 Series	5000'	13 mil	18" Low Flow	\$265.00
Drip Net PC 636 Series	4600'	13 mil	12" Low Flow	\$415.00
Drip Net PC 875 Series	3600'	13 mil	18" Low Flow	\$375.00
Heavy Wall Drip Tube				
UniRam PC 16 mm	1000'	45 mil	24" Low Flow	\$185.00
Drip Net PC 16 mm	1000'	45 mil	24" Low Flow	\$156.00
Aries non PC 16 mm	1000'	35 mil	24" Low Flow	\$100.00

Above are some of the thin wall drip lines that we try to keep in stock. The heavy wall drip tube is sized to meet your requirements and are made to order. There is a minimum order of 3 rolls required and additional shipping from manufacturer.

Toro Aqua-Traxx is a premium drip tape delivering precision, uniformity, durability and plugging resistance. Aqua-Traxx PC is a pressure compensating drip tape for use on difficult terrain where uniformity is desired. Toro Aqua-Traxx drip tape comes in several sizes and options, below are a few of the more popular products.

Product	Diameter	Mil	Roll Length	Emitter Spacing	Flow Rate gpm	Price per roll
Aqua-Traxx	5/8"	8	7500'	12"	.22 or .45	\$160.00
	5/8"	8	7500'	8"	.34 or .67	\$160.00
	5/8"	10	6000'	8"	.67	\$159.00
Aqua-Traxx SR	5/8"	8	2000'	8" or 12"	.34 or .45	\$60.00
	5/8"	15	1000'	8" or 12"	.67 or .45	\$50.00
Aqua-Traxx FC	7/8"	10	4400'	12"	.34	\$195.00
Aqua-Traxx FC	5/8"	8	7500'	12"	.45	\$180.00

Toro BlueLine PC, BlueLine Classic Drip In PC and Drip In Classic are available in 1000' coils in 16, 18 or 20 mm diameter, emitter spacing from 12 to 72 inches and flow rates of .53 or 1 gph per emitter. This product is designed to work with your field layout, available water, and your irrigation goals. Below are a few of the options and pricing.

Product	Diameter	Mil	Coil Length	Emitter spacing	Flow GPH	Price per Roll
BlueLine PC	16mm	.45	1000'	12"	1.0	\$180.00
BlueLine Classic	16mm	.45	1000'	12"	1.0	\$110.00
Drip In PC	18 mm	.45	1000'	24"	.53	\$170.00
Drip In Classic	18 mm	.45	1000'	24"	.53	\$160.00

TORO®

FLEX CONNECT™ LAYFLAT CONNECTION SYSTEM

GET THE BENEFITS OF PRE-INSTALLED FITTINGS...

- ✓ Quick Installation
- ✓ Less labor time and costs
- ✓ Less Leaking
- ✓ Easy storage

WITHOUT THE DRAWBACKS

- ✓ More design flexibility with custom fitting spacing for irregular shaped fields
- ✓ More layout flexibility from season to season
- ✓ More durable tubing
- ✓ Longer product life

FLEX CONNECT™ LAYFLAT CONNECTION SYSTEM

SIMPLE

Optimum-sized eye connection with locking nut provides secure, quick and easy installation:

- Minimizes installation time and labor costs
- Minimizes water leakage

QUICK INSTALLATION

Hexagon installation tool with wrench attachment helps tighten locking nut for secure connection to the Layflat hose:

- Easy-to-grip, hand-sized tool reduces fatigue
- Bright color improves visibility

RELIABLE

Secondary closure nut further secures the valve or adapter to the eye connection:

- Eliminates or reduces field leaks
- Available in both valve and adapter (no-valve) configurations

FLEXIBLE

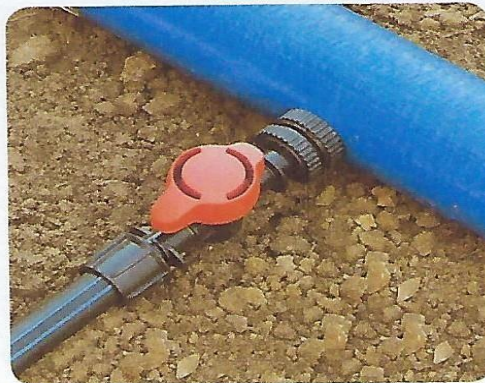

The eye connection fits all tape connection sizes:

- Flexibility to change tape sizes depending on seasonal crop
- Reduces annual fitting costs

LONG-LASTING

Curved valve is ergonomically designed for easy turning and to provide a full flow:

- Manufactured to ISO standards with strong materials to withstand harsh weather conditions and increase life and durability of the product
- Ball valve construction reduces friction loss

EASY-TO-USE AND RE-USE

The Flex Connect System allows the valve or adapter to be quickly and easily removed from the Layflat eye connection assembly at the end of the season. The eye connection remains fixed to the Layflat hose for ease of roll up and storage.

- Reduces costs by extending life of Layflat and fittings
- Enables easy Layflat and fitting re-installation
- Flexibility to install additional take-off locations depending on field dimensions and crop spacing
- Optional eye connection sealing cap available to minimize intrusion of soil or foreign objects during storage

Flex Connect fittings are not only the easiest fittings to install, remove, and reuse – but also lower system costs, minimize water leakage, and increase product life.

FILTRATION

Filtration is essential for any drip irrigation system. If the water is dirty the system will plug. We have a wide range of filters available from simple disc filters for well or city water to sand media systems for pumping surface water.

3/4" Filter

2" Super Filter

6" Twin Filter

Filter	Size	GPM	Price
Manual Disc	3/4"	1-12	\$38.00
Manual Disc	1"	5-26	\$111.00
Manual Disc	1.5"	10-35	\$162.00
Manual Disc Dual HD	2"	40-120	\$563.00
Manual Disc Twin Lite	3"	80 – 220	\$675.00
Manual Disc Twin	4"	160 – 450	\$1800.00
Manual Disc Twin	6"	200 – 600	\$2434.00
Aqua-Clear Sand filter	18"	38 gpm	\$974.00
	24"	62 gpm	\$1400.00
	30"	74 gpm	\$2100.00

Toro Aqua-Clear Sand Media Filter

PRESSURE REGULATORS

Regulators are preset to maintain a constant down stream pressure. Typical drip irrigation systems need to be maintained between 8 and 12 psi. Purchase a regulator that matches your flow rate and upstream pressure.

	Inlet/Outlet Size	PSI	GPM	Price Per Unit
Senninger	$\frac{3}{4}$ " / $\frac{3}{4}$ "	12	1/10 – 8	\$17.00
	1" / 1"	15	2 – 20	\$21.00
	1.25" / 1"	10	10 – 32	\$41.00
Netafim	$\frac{3}{4}$ " / $\frac{3}{4}$ "	12	4.5 – 17.6	\$23.00
	1.5"/1.5"	12	11 – 35	\$57.00
	2" / 2" – 4 units	12	22 – 70	\$132.00
	2" / 2" – 6 units	12	33 – 105	\$303.00
	3" / 3" – 10 units	12	35 - 175	\$553.00

CONTROL VALVES

There are several options in the type of valves used in different applications. There are pressure reducing, pressure sustaining, normally open, normally closed, manual, electric and remote control. Valve selection needs to include size, gallons per minute and purpose. Some examples are below.

Valve	1"	1.5"	2"	3"	4"
Manual	\$140.00	\$202.00	\$218.00	\$363.00	\$692.00
Electric 3 Way (24VAC)	\$242.00	\$302.00	\$320.00	\$467.00	\$806.00
Manual Electric	\$309.00	\$372.00	\$386.00	\$535.00	\$848.00
Pressure Reducing	\$332.00	\$390.00	\$407.00	\$550.00	\$848.00

Single Valve with programmable controls

2 way valve w/controller 12 VDC latching solenoid	$\frac{3}{4}$ "	1"	1 $\frac{1}{2}$ "	2"	
Series 80	\$208.00	\$208.00	\$327.00	\$373.00	

IRROMETER – Soil Moisture Indicators

Irrrometers are an inexpensive, easy to use instruments that accurately measure the soil water in the root zone or your crop. By managing your irrigation you can save water, fertilizer and energy while producing a quality crop.

	6"	12"	18"	24"
Model SR	\$89.00	\$92.50	\$96.00	\$99.50
Service Kit – 1 Kit services several irrometers Includes Hand vacuum pump, irrometer fluid, char forms and reference book				\$65.00

FERTILIZER INJECTION SYSTEMS

Take full advantage of your drip irrigation system by adding fertilizer to the plants when they need it most.

Mazzei Differential Pressure Injectors - Polypropylene	Size	GPH	Cost
Model 484 –A	¾"	17	\$70.00
Model 878	1"	75	\$134.00
Model 1583-A	1.5"	227	\$192.00
Model 2081-A	2"	631	\$350.00
Strainer with ¼" barb			\$14.00
Metering Valve for ¾" injector – fits suction tubing			\$124.00

We can build you a complete injection system designed for your needs. Includes a Mazzei injector, valves, suction screen and fittings to insert injector into your existing line.

MAXIMIZE HEMP PRODUCTION WITH DRIP IRRIGATION AND PLASTIC MULCH

Hemp is a versatile plant that can be grown and used in many industries such as textiles, food and beverage, construction and pharmaceuticals. Interest in Hemp production has increased with the 2018 passage of the Federal Farm Bill that made industrial hemp legal to grow as an agricultural commodity. Check your state for laws regarding Hemp production.

Maximize your Hemp production with the use of drip irrigation and plastic mulch. Drip irrigation will provide your plants with the water and nutrients required. Plastic mulch will help with weed control and moisture loss. We also carry layflat hose, fittings, filters, pressure regulators, valves and controllers to set up a complete system.

Call us. We can help design your irrigation system and supply you with the products needed to get you growing.
