

Reinke

MORE RIGHT THAN RAIN

PARTS CATALOG

Insist on the best!

**Genuine Reinke repair parts from your local Reinke dealer
no matter what brand of irrigation system you own!**

Quality Irrigation Products Since 1968

OUR MISSION...

TO EXCEED OUR CUSTOMERS'
EXPECTATIONS OF QUALITY,
SERVICE, AND
INNOVATION.

At Reinke Manufacturing Company, Inc. we are dedicated to your success. That's why we offer only the highest quality items at the most competitive prices.

Founded in 1954, Reinke Manufacturing Company, Inc. is one of the world's oldest and largest manufacturers of center pivot and lateral move irrigation systems. Reinke is a pioneer in agricultural mechanized irrigation technology, designing the first reversible, electric-gear-driven center pivot system with a bowstring truss. Headquartered in Deshler, Neb., Reinke's products are used throughout the United States and Canada and in more than 60 countries worldwide.

For more information on Reinke products, visit www.reinke.com or call our toll free Grower's Hotline at 866-365-7381 to locate the nearest full-service Reinke dealership.

RPM - MCP

The first level of our all new RPM (Reinke Precision Management Main control panels. The RPM panel is our most basic design and comes standard with a dial timer, voltmeter, hour meter and main disconnect switch along with all the additional operator controls needed to effectively manage your irrigation system. The RPM panel is designed to allow quick and easy upgrades and will stand up to the rigorous requirements of agriculture today and far into the future.

140801 MCP-RPM STANDARD

RPM Advanced - MCP

The RPM Advanced panel is designed for more precise control of your irrigation system and comes standard with our industry leading PAC III timer / controller technology along with all the additional operator controls needed to effectively manage your irrigation system. The RPM Advanced panel is also designed to allow quick and easy upgrades and if paired with our exclusive Navigator line of GPS controls you can achieve unparalleled system accuracy.

140802 MCP-RPM ADVANCED

RPM Preferred - MCP

The RPM Preferred panel is unsurpassed in regards to precision control of your irrigation system and comes standard with our industry leading RAMS (Reinke automated management system) technology. The RPM Preferred panel is a computerized panel with the extensive controls needed to meet the requirements of precision agriculture today and far into the future. If paired with our exclusive Navigator line of GPS controls you can achieve the pinnacle in system accuracy.

140803 MCP-RPM PREFERRED

RPM Preferred With Touch Technology

The ultimate in our RPM series of main control panels is our RPM Preferred Touchscreen control panel. This industry leading panel is unparalleled in regards to its ease of use and precision control of your irrigation system. This panel utilizes a 10.1", sunlight readable, LCD, touchscreen to simplify the user experience making all options just a couple simple taps to the screen away. Items like end guns, barriers and auxiliaries can be reset in seconds eliminating the hassle of paging through screens to get where you want. The RPM Preferred Touchscreen panel is a fully computerized, windows based main control panel with the enhanced controls needed to meet the requirements of precision agriculture today and far into the future. If paired with our exclusive Navigator line of GPS controls you can achieve the pinnacle in system accuracy.

PAC Timer

Features

- Works on most brands of equipment.
- Repeatable accuracy.
- Programming for the control of two end guns or one end gun and one auxiliary.
- Controls can be programmed for both center pivot and lateral move systems.
- Allows separate speed settings for forward and reverse directions of travel.
- The best choice for part circle applications.
- Gives you the ability to break your field into 10 sectors and change speed, end gun and auxiliary programs by sector.
- Delay at barrier programming
- System can stay at a barrier and continue to water for distribution at the barrier up to 10 minutes to insure even water.

- 162782 PAC BASIC RETRO KIT
- 167008 PAC II END GUN GPS RETRO
- 163391 PAC II W/ RESOLVER-END GUN ADD ON KIT
- 167009 PAC II END GUN GPS ADD ON RETRO
- 167012 PAC END GUN GPS ADD ON RETRO MAXI
- 167013 P.A.C. II END GUN GPS RETRO MAXI
- 163392 P.A.C. II FROST KILL RETRO KIT

Wireless Controller

- All units are transceivers for flexibility of installation
- Program Units in the field to be either a master or a slave
 - One to One
 - Operation with one master and one slave
 - Inputs at the master operate the corresponding output relay on the slave
 - Many to One
 - Multiple masters control one slave
 - One too Many
 - One master controls multiple slaves
- 4 Input channels
- 4 independent relay outputs
 - Relay 1, SPDT *8A, 120vac max
 - Relay 2, SPDT *8A, 120vac max
 - Relay 3, SPDT *8A, 120vac max
 - Relay 4, SPDT *8A, 120vac max 5 second "ON DELAY"
- Powerful 150MhZ radios for increased reliability
3/4 mile communication range
- Configure to reduce interference (in field)

Part Numbers

- 353365 WIRELESS CONTROLLER - PAIR
- 353366 WIRELESS CONTROLLER - SINGLE

End Tower Location

- ◆ Achieve unparalleled accuracy when integrated with the Reinke Preferred or Advanced panel.
- ◆ Sector programming allows for a change in application rate up to 10 times in the same field.
- ◆ Can be used on towable systems and is capable of storing up to 4 base reference points.
- ◆ Better end gun control with all system configurations.
- ◆ W.A.A.A. (Wilde Area Augmentation System) - enabled for unprecedented accuracy.
- ◆ Can be added to any system with the simple addition of a PAC timer.

Swing Arm Corner System and Lateral Move Guidance

- ◆ Can be retro fitted to all Reinke systems and most competitive brands of equipment.
- ◆ Operate multiple systems with one base unit (*still requires GPS equipment on each system*)
- ◆ Surveyor-grade equipment.
- ◆ Sub centimeter accuracy.
- ◆ In many cases can be integrated with existing precision agriculture GPS equipment.

NAVIGATOR™ End Tower Control Options

- 167007 GPS RESOLVER RETRO KIT - Used for the RAMS Panel
- 167008 PAC II ENDGUN GPS RETRO - Used for panels with the ATC timer in them.
- 167009 PAC II ENDGUN GPS ADD-ON RETRO - Used for panels with PAC Timers in them.
- 167012 PAC ENDGUN GPS ADD-ON RETRO MAXI - Everything needed to update a PAC II timer to GPS on a lateral.
- 167013 PAC II ENDGUN GPS RETRO MAXI - GPS / PAC III kit for a lateral move system including PAC III timer.
- 167014 GPS RESOLVER OPTION MAXI RETRO - Used to update a lateral move RAMS from a resolver to GPS.

NAVIGATOR™ Guidance Options

- 167000 SWING ARM CORNER GPS GUIDANCE RETRO - KIT
- 167001 SWING ARM CORNER GPS GUIDANCE RETRO - KIT FOR SYSTEMS EQUIPPED WITH PLC
- 167002 LATERAL MOVE SYSTEM GPS GUIDANCE RETRO - KIT
- 167003 LATERAL MOVE SYSTEM GPS GUIDANCE RETRO - KIT - WITHOUT BASE STATION

Satellite Telemetry

OnTrac Satellite Technology

Control your system with any or all of the following devices.

- Cell Phone
- Landline Phone
- Wireless PC
 - Pager
- Handheld PC
- Smart Phones
- Home Computer

- Allows installation in remote areas that have limited or no cellular reception, making OnTrac more reliable than cellular communication.
- Eliminates signal reception issues caused by tall crops, terrain, buildings and equipment.
- Ensures service and compatibility well into the future.
- Multiple means of notification.
- Works on all brands of irrigation systems.
- Wide variety of options allow you to customize the equipment to fit your needs.
- Alerts you of all changes in status of their irrigation system.
- Allows you to view system status on the internet.
- Installs easily with no wiring required on the basic model.

Alert Notification to any or all of the following devices

- Cell Phone
- Text Message
 - Voice
- Landline Phone
- Wireless PC
 - Pager
- Handheld PC
- Smart Phones
- Home Computer
 - Email
- Secure Internet web site

Available Options

- Remote Stop
- Remote Start
- GPS Option
- Pressure monitoring.
- Rainfall reporting on the Internet.
- Flow Monitoring.
- Plus Much, Much more.....!

350730 - PRESSURE SWITCH KIT REPORTING WET OR DRY

350734 - PRESSURE TRANSDUCER KIT MONITORS ACTUAL SYSTEM PRESSURE

350734R - TRAC KIT PRESSURE TRANSDUCER FIELD UPDATE KIT (update kit for existing units already in the field)

350740 - RAIN GAUGE KIT - USED TO MONITOR RAINFALL, REPORTS EVERY .04 OF AN INCH

Available Units

350720 - TRAC POST-TWR MNT-MONITOR

350722 - TRAC POST-TWR MNT-W/STOP

350724 - ONTRAC-TOWER MOUNT-WITH STOP

350724GPS - ONTRAC-TOWER MOUNT-WITH STOP AND GPS

350725 - ONTRAC-PIVOT MOUNT-WITH STOP & START

350728 - TRAC-TOWER BOX-NO SOLAR

350728GPS - TRAC-TWR BOX WITH GPS-NO SOLAR

350728C - TRAC-TWR BOX-GPS CONV-NO SOLAR

350762 - TRAC KIT CENTER MOUNT GPS

2000A	2000	139.8"	10" - 12"	16"	6"	4"	360#

- Comes standard with a 24 Gauge Stainless Steel Screen with 3/32" (.094") perforations.
- Additional Screen Sizes Available from 1/64" to 1/4".

Standard Equipment

Barrels - Galv. or Enamel
 Ring Band Lock
 Replaceable Gaskets
 Can Be Welded Into Line
 Stainless Steel Screens
 Self Cleaning Blow Off
 0 to 125 Working Pressure

Optional Equipment

(2) Pressure Gauges
 Filter Manifolds Available
 Blow Off Valve (Gate or Ball)
 Air Vent
 Flanged, Ring Lock, or Victaulic Ends
 Larger Blow off up to 4"
 Outlet In Any Position (Pivot Pad to Pivot)
 All Stainless Steel
 Screen Brushes
 125 to 300 Working Pressure

Standard Clemons Filters - As pictured above.

Agri-Inject

Chemigation Units

- ◆ Applications of herbicide, insecticide, fungicide or fertilizer are made easy and virtually trouble free on nearly any crop.
- ◆ Each unit is complete chemigation package, mobile enough to move from one location to another
- ◆ 70,110, and 200 gallon tank options available. Customize to your needs.
- ◆ Control pump and agitator independently.

Large Capacity Chemigation Units

- ◆ Same high quality technology that makes it possible to inject small amounts of liquid chemical into the irrigation stream.
- ◆ Engineered to distribute large quantities of highly viscous - even slurried - material through your irrigation system. Even the heaviest materials are kept in complete suspension for a uniform application across your fields.
- ◆ Sizes from 300 to 600 gallon tanks.
- ◆ Ideal for high volume pumps.

Insectigation Units

- ◆ Easily moved from one location to another. Lets you respond to insect problems when and where they arise.
- ◆ High degree of accuracy coupled with extreme 1:1000 turndown range allowing for very minute injection volumes.
- ◆ Customize to fit your needs with 10 gallon, 20 gallon, or 30 gallon tanks.
- ◆ System only pulls 3 amps at start-up and easily adapts to any power supply.

Total Containment Units

- ◆ Totally enclosed to eliminate expensive chemical leakages.
- ◆ 60 or 90 gallon containment units provide a high level of environmental protection.
- ◆ Units are ideal when using expensive chemicals.
- ◆ Same ultra efficient agitation system.

Milton Roy Pumps

- ◆ Versital design allows pump to be configured for most any application; including acids and high viscous liquids, potentially eliminating the need for multiple pumping units.
- ◆ Available in 3 ph, 12 volt, and 1 ph configurations.
- ◆ Worm & pinion drive produces a smooth, continuous mechanical motion that eliminates “wear and tear”.
- ◆ Micrometer capacity adjustment for accurate output flow control.

Fertigation Units

- ◆ Available in a wide variety of pump configurations.
- ◆ Ready to attach to any large capacity fertilizer tank.
- ◆ Pinpoint pumping accuracy that eliminates expensive product waste.
- ◆ Easily adjustable, without shutting down. Pumping accuracy at the twist of a knob.
- ◆ Three overload and surge protected power supply options for reliable, worry-free operation.

Mister Mist'r Injection Check Valve

- ◆ The Mister Mist'r™ is a patented injection check valve which is the choice of many governmental agencies.
- ◆ Achieves thorough mixing, superior distribution, and efficiency.
- ◆ Available in configurations for a variety of chemicals, including most acid and chlorine
- ◆ Bleeder valves are designed to allow for easy pump priming while directing chemicals away from the operator.
- ◆ Bleeder valves constructed of chemical-resistant plastic with chemical-resistant o rings.
- ◆ 1/4" FNPT inlet threads; 1/4" MNPT outlet threads.
- ◆ Mister Mist'r™ can be adapted to work with any size pipe.

Phase Converters

15

The UL Listed ROTO-CON® is an economical and dependable rotary phase converter that can operate a wide variety of equipment. Rotary phase converters' flexibility in operating different loads make them an economical alternative to costly three-phase line extensions and their associated demand charges. They are easily installed, require minimal maintenance, and give years of trouble-free service.

The ROTO-CON® is our most widely used and least expensive rotary phase converter. It is best suited for operating motors that do not operate continuously at high loads. Applications such as metal or woodworking shops, grain handling and milling, pivot irrigation towers, print shops, and food processing generally have these types of loads.

The ROTO-CON® is available with total load ratings from 2 to 200 HP for both 240 volt or 480 volt operation. If needed, special voltage or larger horsepower units can be accommodated.

Due to multiple options please call for availability and configuration.

Due to multiple options please call for availability and configuration.

The ROTOVERTER® is the only rotary converter that can simulate the current balancing capability of our ADD-A-PHASE®, thanks to its patented "tapped windings." The tap adjustments give you control over all three phases for balancing currents. Standard rotaries actually allow control of only two of the three phases. This balancing capability is especially important for motors that operate for extended periods at or near full load, and for higher power factor motors. Examples of such loads would be grain dryer or other fan motors, pumps, or continuously operating compressors.

For total loads up to 150 HP, the Type "C" ROTOVERTER® is recommended for multiple loads of varying horsepower ratings. The Type "D" ROTOVERTER®, available for total loads up to 52.5 HP works for applications where a single load (of either a single or multiple motors) is to be operated. It can also be used to power non-motor loads. Both types are available in either 240 volt or 480 volt units. CSA approved units are available up to 120 KVA.

Often referred to as a "static" phase converter, the RONK AD-A-PHASE® is actually a *full load*, autotransformer-capacitor style converter. The idea that the ADD-A-PHASE® is limited to one motor load only is absolutely false. There are ADD-A-PHASE® in operation now operating up to 6 motors, at full load, from one single unit.

The RONK ADD-A-PHASE® is still the most efficient phase converter manufactured today. The design allows adjustment to provide balanced three-phase power at any motor load up to the converters rating. The high efficiency (97%) and low standby losses make the ADD-A-PHASE® ideal in most automated applications.

The autotransformer design of the ADD-A-PHASE® allows the capability to dictate the output voltage, therefore eliminating the need for costly external step-up or step-down transformers.

Due to multiple options please call for availability and configuration.

TO ORDER CALL YOUR LOCAL REINKE DEALER

BENEFITS:

Increase Flotation

- The Agri-Trac provides 5 times as much ground surface area. Its concave shape and unique rolling action reduces wheel rut depths by 80%. The Agri-Trac prevents center pivots and lateral move systems from getting stuck in the mud even on the most difficult soils.

Increase Traction

- The tire tread bars mesh with the Agri-Trac treads and will not slip inside the track even on hills with slippery soils. The Agri-Trac provides 10 times as much tread length and traction.

Operates Smoothly

- The Agri-Trac rolls smoothly on small diameter tires without increasing the load on gearboxes. Expensive high flotation tires or large diameter tires are no longer needed. The Agri-Trac protects tires from sharp rocks and rotting sunlight.

Quality Construction

- The Agri-Trac is warranted for one year against defects in materials or workmanship. The Agri-Trac is hot dip galvanized to prevent rust and corrosion.

* Agri-Trac only fits on recap tires

* Competitive models available to fit 11 x 24.5 recap.

* Does not include tire/wheel

112288 - HINGE ASY AGRI TRAC

112289 - WHEEL SPACER - AGRI TRAC W/ STUDS

162290 - AGRI TRAC 11 X 22.5 PER TWR-RTRO-Includes Spacers and Tracs for 1 complete tower.

Sprinkler Lube 1200 is the first lubricant of its type, specifically designed for wheel gears and capable of surpassing the rigorous requirements of today's irrigation systems.

Sprinkler Lube assures maximum protection against corrosion of metal parts. This keeps the lubricant in good condition for extended service intervals. It is high-pass, which means it will not attack or corrode copper or brass, leaving the interior of the gearbox looking nearly new. Sprinkler Lube's superior anti-wear, extreme pressure agents protect against metal to metal contact and wear under excessive pressure or shock loads, increasing gear and bearing life. Special adhesive / cohesive additives make this product extremely sticky which allows it to form a grease seal on worn shafts, keeping lubricant in and water out. This also keeps lubricant on metal parts eliminating dry starts or contact with moisture. Unlike traditional gear oil, the thicker, gel-like consistency of Sprinkler Lube makes it less likely to leak from the gearbox.

Sprinkler Lube 1200 Benefits

- Less Downtime.
- Longer Seal Life.
- Longer Gearbox Life.
- Longer Lubricant Life.
- Resists water infiltration.
- Superior Anti-Wear Protection.
 - Becomes highly fluid at wear points to resist wear and move foreign material away from load area.
- Excellent Extreme Pressure Protection.
- Protection Against Gear Scoring.
- Less Seal Leakage.
 - Retains thickness at seal contact points to resist leakage.
- For use in all brands of center pivot irrigation systems.
- Reduces startup water.
- Provides a protective seal against rust and corrosion for all internal parts.
- Contains tackifiers to maintain a lubricating coating on all parts.

Wheel Gear Lubricant

Wheel Gears

Input shaft cover snaps over unused end to guard against seal and shaft damage.

Non-Seizing fill plug for easy maintenance.

Rolling diaphragm to relieve both positive and negative pressures.

“New” pressed in cartridge style input seal provides a polished surface for seal to contact.

Largest input bearings in the industry. Provide 55% greater load capacity.

Corrosion resistant diaphragm cover.

Bull gear designed for greater tooth contact resulting in increased load capacity.

Large 2 1/4” output shaft and flange are made of high strength steel to exceed today’s demanding conditions.

Dual input shaft for universal mounting.

Cast steel end cap for the increased load demands of today’s larger tires and difficult terrain.

Seal protector blocks out contaminants and extends seal life.

Centering ring doubles as a load-bearing surface relieving stress on the lug bolts and lessening potential wheel damage.

Non-Seizing drain plug for easy maintenance.

Reinforced housing provides more material in high stress areas increasing the overall strength of the gearbox.

112118 WHEEL-GEAR REINKE NON TOW - 2.25”

- ◆ Standard wheel gear used on all Reinke systems.
- ◆ Used on competitive brands such as Zimmatic, Gifford Hill, Pierce & Lockwood, among others.
- ◆ Economical “Retro Kits” are available to convert many different makes of systems.

REINKE MANUFACTURING COMPANY, INC.

- ◆ Ultimate Duty Final Drive wheel box with larger bearings and 2 1/2" output shaft for longer spans, larger wheels, and heavier towers on all electric drive and hydraulic powered center pivot lateral move systems.
- ◆ Standard equipment on all Reinke Swing Arm Corner systems and lateral move power tower carts.

112104 WHEEL-GEAR REINKE NT - 2.5"

- ◆ 52:1 Worm gear ratio with extended output shaft to match those provided by original equipment manufacturer.
- ◆ Ultimate Duty Final drive wheel box with larger bearings and 2 1/4" output shaft for longer spans, larger wheels, and heavier towers on all electric drive and hydraulic powered center pivot lateral move systems.

112119 WHEEL-GEAR UMC VALLEY #725 UV

- ◆ Larger diameter Bull Gear to provide 20% higher output torque on all electric drive and hydraulic powered center pivot lateral move systems.
- ◆ Optional equipment for Reinke Swing Arm Corners (SAC).

112105 WHEEL-GEAR-NON TOW - UMC 760

- ◆ Towable Final drive wheel box, provide the ability to disengage the worm gear and allows users of all electric drive and hydraulic powered center pivot lateral move systems to move systems from one area to another.

112109 DRIVE ASSEMBLY-TOW / NON TOW-#10140-101A

Driveline Couplers

- 1" Round X 3/4" Square.
- Pin centering design.
- Heavy Duty Urethane puck.
- Standard equipment on all Reinke systems.

112454 HIGH TORQUE DRIVE COUPLER

- Used on older Valley systems.
- Pin centering design.
- Heavy Duty Urethane puck.

112458 HIGH TORQUE COUPLER 1" ROUND X 1" SQUARE

- Used on all current Valley systems.
- Pin centering design.
- Heavy Duty Urethane puck.

112459 HIGH TORQUE COUPLER 1" ROUND X 7/8" SQUARE

- Complete bolt package for all high torque coupler packages listed.

112466 HIGH TORQUE COUPLER-BOLT-PACKAGE

- Used on Reinke Swing Arm Corners with extra heavy duty model 760 wheel gears.
- Heavy Duty Urethane puck.

112468 HIGH TORQUE COUPLER 3/4 SQUARE X 1-1/8 ROUND

- Heavy Duty Urethane puck.
- Pin centering design.

112461 HEAVY DUTY HIGH TORQUE COUPLER INSERT

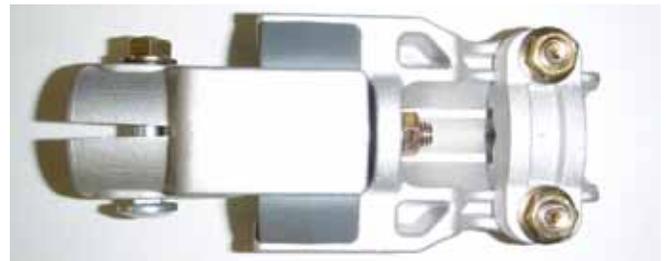

- Fits all brands of equipment
- Fits inside of the Reinke U-Joint Shield
- Is a disc style/ belted coupler
- Special high polymer disc
- Exclusive to Reinke Mfg

112470 - BELTED/DISC COUPLER

142178 U-JOINT - 3/4 X 1 X 6

- Steel U-Joint.

112469 COUPLER-HI TORQUE UMC C-X HD

- Heavy Duty Urethane puck.
- Universal for all brands equipment.

Center Drives

21

- ◆ Universal mounting pattern to fit most makes and models of irrigation systems
- ◆ 95% Efficient planetary design for increased torque with reduced energy costs.
- ◆ All aluminum gear case and motor housing for improved corrosion resistance.
- ◆ Heat treated gears.
- ◆ High strength steel shafting and heat treated gears for superior durability and strength to insure long life.

MOTORS WITH THERMAL OVERLOADS

- 112254 GEAR MOTOR-30:1-W/TP
- 112255 GEAR MOTOR-40:1-W/TP

MOTORS WITHOUT THERMAL OVERLOADS

- 117770 GEAR MOTOR-25:1-W/O TP
- 117771 GEAR MOTOR-40:1-W/O TP

- ◆ Complete centerdrive for competitive brands of equipment.
- ◆ Available in 58:1, 47:1 and 31:1 ratio.
- ◆ Splined shaft.
- ◆ Stainless steel and aluminum construction.

- C12250VZ
GEAR-MOTOR-58:1-1 HP US
- C12251VZ
GEAR-MOTOR-47:1-1 HP US
- C12252VZ
GEAR-MOTOR-31:1-1.5 HP US

- ◆ Worm Drive replacement centerdrive.
- ◆ For use with C-faced motors.
- ◆ Available in multiple ratios.
- ◆ Multiple bolt patterns for universal mounting.

- 112173 CENTER-DRIVE UMC-50:1
- 112174 CENTER-DRIVE UMC 30:1
- 112175 CENTER-DRIVE UMC-40:1
- 112176 CENTER-DRIVE UMC-60:1

- ◆ Worm drive replacement module for competitive brand equipment
- ◆ Splined shaft.
- ◆ Available in 58:1 or 47:1 ratios

- C12175VZ
GEAR MODULE-47:1 RATIO
- C12176VZ
GEAR MODULE-58:1 RATIO

- ◆ Available in 1 horsepower 40:1 and 3/4 horsepower 60:1 configurations
- ◆ Internal thermal overload protection.
- ◆ An available option on previous Reinke center pivot models.

- 112258
GEAR/MOTOR-US-3/4 HP 60:1
- 112259
GEAR/MOTOR-US-1 HP 40:1

- ◆ US Motors worm gear reducer
- ◆ 21:1 Ratio
- ◆ Standard with C-face adapter

- 112164
GEAR MODULE-US-21:1

- ◆ 220 Volt Single phase center drive unit.
- ◆ 80:1 ratio - 40:1 helical gear with a 2:1 reducer.

- 112257
CENTER DRIVE-UMC

TO ORDER CALL YOUR LOCAL REINKE DEALER

Centerdrive Motors

- ◆ 1-1/2 Horsepower.
- ◆ To be used where higher torque applications are required such as tighter soils and / or higher speed centerdrives.
- ◆ Will fit Ohio, Dresser and UMC worm drives among others.

C12499

MOTOR-1-1/2 HP-US-C FACE

- ◆ An alternative to C12508 Franklin motor.
- ◆ 1 Horsepower.
- ◆ C-Face mounting.
- ◆ Will fit Ohio, Dresser and UMC worm drives among others.

C12507

US-1 HP-C Face-Motor

- ◆ Replacement motor for Valley systems with vertical US centerdrives in either 47:1 or 58:1 ratio.
- ◆ 1 Horsepower.
- ◆ Splined Shaft.

C12498V

US-1 HP-Motor

- ◆ Motor used on Reinke systems with Ohio gears.
- ◆ 1 Horsepower.
- ◆ Will fit Ohio, Dresser and UMC worm drives among others.

C12508

Franklin-1 HP-C Face Motor

- ◆ Replacement motor for Valley systems with vertical US 31:1 ratio centerdrives.
- ◆ 1 1/2 Horsepower.
- ◆ Splined Shaft.

C12496V

MOTOR-US 1-1/2 HP-SPLINED SHAFT

- ◆ Replacement stator (motor windings less armature) for Valley systems with vertical US centerdrives in either 47:1 or 58:1 ratio.
- ◆ 1 Horsepower.

C12165V

STATOR-1 HP-WITH END COVER KIT

- ◆ Thermally protected.
- ◆ 1 horsepower motor.
- ◆ C-Face mounting.
- ◆ Will fit Ohio, Dresser and UMC worm drives among others.

C12500

MOTOR-US-1 HP-C FACE WITH THERMAL OVERLOAD

Centerdrive Motors

23

- ◆ A thermally protected Franklin motor like the one used on Reinke systems with Ohio gears.
- ◆ Will fit Ohio, Dresser and UMC worm drives among others.
- ◆ One horsepower.

C12497

MOTOR-1 HP C FACE-FRANKLIN WITH THERMAL OVERLOAD

- ◆ Motor used on Reinke systems with Ohio gears through as late as 1997.
- ◆ Will fit Dresser and UMC worm drives among others
- ◆ 1 1/2 Horsepower.

C12509

FRANKLIN-1 1/2 HP-C FACE-MOTOR

- ◆ Replacement motor module for: 112258 GEAR / MOTOR-US.
- ◆ 3/4 HP.

112260

MOTOR MODULE-3/4 HP - US

- ◆ Replacement motor module for: 112259 GEAR / MOTOR-US.
- ◆ 1 Horsepower.

112261

MOTOR-MODULE-1 HP - US

- ◆ Replacement motor for single phase system.
- ◆ 1 Horsepower.
- ◆ 230 Volt.

112557

MOTOR-SINGLE PHASE-1 HP 230V AC

- ◆ Replacement strators for US Motors manufactured Reinke centerdrives.
- ◆ Includes motor windings, end cap with bearing and silicone sealant.

142165-S STATOR-STD SPEED-NO OVLD
142166-S STATOR-HIGH SPEED-NO OVLD
142167-S STATOR-LOW SPEED-US
142168-S STATOR-STD SPEED-US
142169-S STATOR-HIGH SPEED-US

- ◆ Replacement stators for UMC/Reinke centerdrives.
- ◆ 117773 is the motor for 112255
- ◆ 117774 is the motor for 117769
- ◆ 117778 is the motor for 117772

GLOSSARY

- | | |
|----------------------------------|---------------------|
| E1 = Electrogator I | ALUM / A = ALUMINUM |
| E2 = Electrogator II (Old Style) | ND = Normal Duty |
| M1 = Minigator I | HD = Heavy Duty |
| M2 = Minigator II | H / T = High Torque |
| M3 = Minigator III | US = US Motors |

- Designed to work on all brands and models of equipment.
- A complete bolt on kit available for most applications.
- Lateral alignment on both sides of the pipeline helps keep systems straighter especially in fields with undulating terrain.
- Double walled tower box for added strength and elimination of condensation inside the box.
- Heavy duty components to insure years of trouble free service.
- Interlock to insure safety. Tower box can not be opened without shutting off the power.

Features and Benefits

- ◆ Air relief.
- ◆ Vacuum air relief.
- ◆ Continuous air release under pressure.
- ◆ All corrosion resistant material.
- ◆ Self cleaning float guides work in dirty water.
- ◆ High capacity aerodynamic design resists blowing closed.
- ◆ Working pressure to 200 psi.
- ◆ Discharge elbow with internal protective screen.
- ◆ Inlet 2" male NPT.
- ◆ Outlet fits 1 1/2" PVC.

- ◆ Uniform application pattern.
- ◆ 18 degree trajectory.
- ◆ Slow reverse for low vibration and stress.
- ◆ Anti-stall operating pressure of 30 to 100 pounds per square inch.
- ◆ Optimum operating pressure of 45 to 65 pounds per square inch.

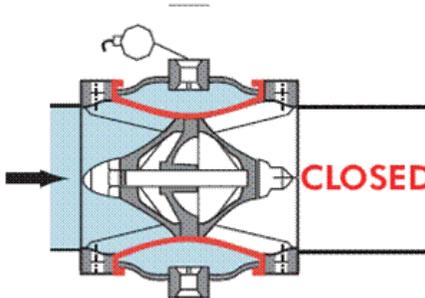

TO ORDER CALL YOUR LOCAL REINKE DEALER

BASIC OPERATION

Water pressure is relieved from the sleeve chamber, allowing the valve to open.

Upstream water is applied to the outer sleeve chamber, the sleeve becomes hydraulically balanced and the flow passage is closed off by the sleeve pressing against the center seat.

- ◆ High flow capacity with low friction loss.
- ◆ Superior pressure control.
- ◆ Lightweight and compact design for installation and repair.
- ◆ Special natural rubber sleeve which is resilient under high pressure, resistant to common irrigation chemicals, and flexible to assure a leak proof shutoff.
- ◆ Highest quality heavy duty materials of corrosion resistant galvanized steel, brass and coated cast iron and a hard chromed pressure regulating spool.
- ◆ Special design that requires minimal water flow to operate, reducing solenoid and regulator plugging.
- ◆ Self flushing inlet screen.
- ◆ Freeze proof external filter.

KOMET INTRODUCES ANOTHER NEW PRODUCT INNOVATION

The Komet 850 Series Valve has no mechanically moving parts and is extremely reliable due to the simple innovative design with only 3 major components. It can be operated by an electric solenoid or by the differential pressure from a booster pump. This valve is designed for excellent performance and outstanding reliability.

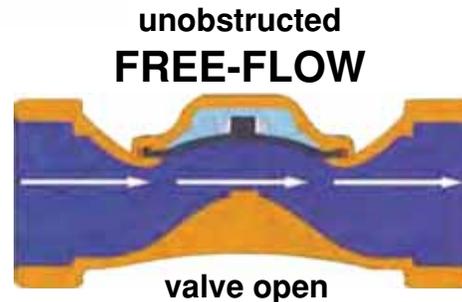

**Komet End-Gun
with 850 series valve**

INNOVATIVE FREE-FLOW VALVE TECHNOLOGY

The new Komet 850 Valve is manufactured with a state of the art elliptic diaphragm. This diaphragm was designed for a quick response that provides a smooth operating range from 7 PSI to 228 PSI and an unobstructed free-flow.

Komet 850 Series Valve
Also available as right angle valve

FEATURES

- Minimal pressure loss
- Designed for unobstructed water flow
- Innovative elliptic shaped diaphragm
- Ductile iron body
- No maintenance
- Bolted face plate
- Automatic air release valve (optional)

BENEFITS

- Allows for high flow capacity
- Clog resistant operation with unmatched hydraulic performance.
- Provides smooth operation from 7 to 228 PSI
- Adds exceptional structural strength to the valve
- Valve requires no periodic maintenance
- Valve can easily be serviced in-line
- Releases trapped air for proper priming of booster pump

THE KOMET ADVANTAGE - Superior Performance through Innovative Technology

111792	REGULATOR-PMR 40# MF 3/4 F

Pivot Special Regulator (PSR)

<u>Part #</u>	<u>Description</u>
	Flow (.5 to 15 gpm)
111810	REGULATOR-PSR 6# -3/4 F
111811	REGULATOR-PSR 10# -3/4 F
111812	REGULATOR-PSR 15# -3/4 F
111813	REGULATOR-PSR 20# -3/4 F

Senninger

Xi-Wob

- Low pressure operation (10 to 15 PSI).
- Excellent distance of throws up to 46 feet in diameter.
- Specifically designed for polyethylene or galvanized drops.
- Utilizes Senninger's proven I-Wob technology.
- Ultra-low application intensity to preserve soil integrity.
- Two different grove geometries to provide application flexibility.

Xi-Wob
605 TOP

- Designed for top of pipe

Xi-Wob
615-GROOVE

- Higher trajectory for better overlap

Xi-Wob 610-6 GROOVE

- Larger droplets to maximize wetted diameter

Xi-Wob 910-9 GROOVE

- Smaller droplets for heavier soil types.

Tower Leg Mounted

PVC

<u>Part #</u>	<u>Description</u>
161710	RETRO TOWER LEG BOOM BACK-PVC
161715	RETRO TOWER LEG BOOM BACK-PVC

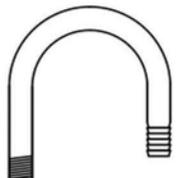

Galvanized

<u>Part #</u>	<u>Description</u>
161712	RETRO TOWER LEG BOOM BACK-GALV
161716	RETRO TOWER LEG BOOM BACK-GALV

Goosenecks and U-pipe

Part #	Description
8099	U-pipe 3/4" M x M Galvanized
8100	U-pipe 3/4" M x F Galvanized
8101	U-pipe 3/4" M x HB Galvanized

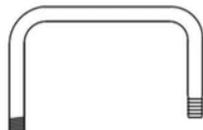

Part #	Description
113809	Gooseneck M x HB PVC
113810	Gooseneck M x F PVC

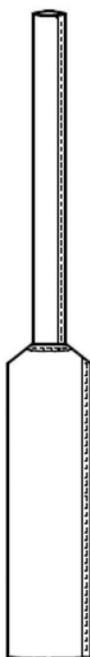

Furrow Arms

Part #	Description
8185	M x HB-20" Galvanized
8187	M x HB-12" Galvanized
8189	M x F-12" Galvanized

Part #	Description
8314	M x HB-12" PVC

Part #	Description
8198	M x M-12" Aluminum

Hose

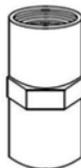

Part #	Description
111172	3/4" PVC 250' Roll

Clamps/Tools

2511	1" Screw clamp
2534	1 1/2" Screw clamp
2519	1 1/16" Oetiker clamp
117519	Oetiker crimp tool

Drag Sock

Part #	Description
8505	Sock-hose drag

PVC Fittings

Part #	Description
8266	3/4" M x HB
8267	3/4" HB x HB
8280	3/4" F x F
8281	3/4" Close Nipple
8309	3/4" F x F x F Tee
8327	3/4" F x HB

Galvanized Steel Fittings

Part #	Description
8011	Bushing-3/4" x 1"
8021	Coupling-3/4" F x F
8030	Nipple-3/4" Close
8177	Nipple-3/4" x 2.5"
8051	Nipple-3/4" x 4"
8190	Nipple-3/4" x 10"

Ball Valves

Part #	Description
8502	Valve 3/4" brass F x F
8508	Valve 3/4" plastic M x F

Drop Weights

Part #	Description
110185	Blk Plastic 2# Slip-30"
110186	Blk Plastic 2# 3/4" F x F-24"
Part #	Description
111978	3/4" M x HB 18" Galvanized
111989	3/4" M x HB 24" Galvanized
111990	3/4" M x M 18" Galvanized
111991	3/4" M x M 24" Galvanized

Sprinkler Drop Pipe

Galvanized Drops

<u>Part #</u>	<u>Description</u>
111992	48" M x M 3/4" NPT
111993	54" M x M 3/4" NPT
111977	60" M x M 3/4" NPT
111981	66" M x M 3/4" NPT
111980	72" M x M 3/4" NPT
111979	78" M x M 3/4" NPT
111958	84" M x M 3/4" NPT
112004	90" M x M 3/4" NPT
112005	96" M x M 3/4" NPT

PVC Drops

<u>Part #</u>	<u>Description</u>
113811	42" M x M 3/4" NPT
113812	48" M x M 3/4" NPT
113813	54" M x M 3/4" NPT
113814	60" M x M 3/4" NPT
113815	66" M x M 3/4" NPT
113816	72" M X M 3/4" NPT
113817	78" M x M 3/4" NPT
113818	84" M x M 3/4" NPT
113819	90" M x M 3/4" NPT
113820	96" M x M 3/4" NPT
113821	102" M x M 3/4" NPT
113822	108" M x M 3/4" NPT

Black Plastic Drops

<u>Part #</u>	<u>Description</u>
143869	24" M x M 3/4" NPT
143870	36" M x M 3/4" NPT
143871	42" M x M 3/4" NPT
143872	48" M x M 3/4" NPT
143873	54" M x M 3/4" NPT
143874	60" M x M 3/4" NPT
143875	66" M x M 3/4" NPT
143876	72" M x M 3/4" NPT
143877	78" M x M 3/4" NPT
143878	84" M x M 3/4" NPT
143879	90" M x M 3/4" NPT
143880	96" M x M 3/4" NPT
143881	102" M x M 3/4" NPT

Mounting Hardware

Area of a Circle

$$\text{Area} = \text{Radius}^2 \times 3.1416$$

Circumference of a Circle

$$\text{Circumference} = \text{Diameter} \times 3.1416$$

Pivot Acreage with End Gun*

$$(L + E)^2 \times 3.1416$$

$$\text{Acres} = \frac{\quad}{43,560}$$

$$L = \text{Pivot length in feet}$$

$$E = \text{End Gun Radius in feet}$$

*With end gun operating continuously.

Time for a Full Rotation by a Pivot

$$2L \times 3.1416$$

$$\text{Hours} = \frac{\quad}{S \times 60}$$

$$L = \text{Distance to last wheel track in feet}$$

$$S = \text{Tower Speed in feet/minute}$$

Approximate Percentage Timer

Setting

$$H$$

$$\% = \frac{\quad}{T \times A}$$

$$H = \text{Hours for full rotation @ 100\%}$$

$$T = \text{Time for 1" Application in Hours}$$

$$A = \text{Application Required in Inches}$$

Estimating Brake Horsepower

Required

$$\text{GPM} \times \text{TDH}$$

$$\text{BHP} = \frac{\quad}{3960 \times \text{EFF}}$$

$$\text{BHP} = \text{Brake Horsepower Required}$$

$$\text{GPM} = \text{Flow Required in GPM}$$

$$\text{TDH} = \text{Total Dynamic Head in feet}$$

$$\text{EFF} = \text{Pump Efficiency in Decimal Form}$$

Flow

Convert Into Multiply by:

Acre-Inch/Hr.	Gallons/Minute	452.6
Acre-Inch	Gallons	27,154.0
Cubic Feet	Gallons	7.481
Cubic Feet/Sec.	Gallons/Minute	448.831
Cubic Meters	Gallons	264.2
Cubic Meters/Hr.	Gallons/Minute	4.403
Liters	Gallons	0.264
Liters/Sec.	Gallons/Minute	15.852
Gallons	Liters	3.785
Gallons/Minute	Cubic Meters/Hr.	0.227
Gallons/Minute	Liters/Sec.	0.063
Liters	Gallons	0.264
Liters/Sec.	Gallons/Minute	15.852
Liters/Sec.	Cubic Meters/Hr.	3.598

Area/Linear

Convert Into Multiply by:

Acres	Square Feet	43,560
Centimeters	Inches	0.394
Meters	Feet	3.281
Miles	Kilometers	1.609
Miles	Feet	5280.0

Pressure

Convert Into Multiply by:

Atmospheres	Pounds/Sq. In.	14.70
Bars	Pounds/Sq. In.	14.50
Feet of Water	Pounds/Sq. In.	0.434
Gallons of Water	Pounds	8.33
Pounds/Sq. In.	Atmospheres	0.068
Pounds/Sq. In.	Bars	0.069
Pounds/Sq. In.	Feet of Water	2.307

Power

Convert Into Multiply by:

Horsepower	Kilowatts	0.746
Kilowatts	Horsepower	1.341

Average Application Rate

$$96.3 (Q)$$

$$\text{AAR} = \frac{\quad}{(SS)(W)}$$

$$\text{AAR in Inches per Hour}$$

$$Q = \text{flow for one sprinkler}$$

$$SS = \text{Average Sprinkler Spacing}$$

$$W = \text{Wetted Band Perpendicular to the System}$$

Depth of Water Applied By a Center Pivot

$$(30.64 \times Q \times \text{HPR})$$

$$D = \frac{\quad}{(PL + \text{EGR})^2}$$

$$D = \text{Depth of Water Applied}$$

$$Q = \text{Flow Rate in GPM}$$

$$\text{HPR} = \text{Hours per Revolution}$$

$$PL = \text{Pivot Length in Feet}$$

$$\text{EGR} = \text{End Gun Radius in Feet}$$

Time for a 1" Application

$$452.6 \times \text{Acres}$$

$$\text{Hours} = \frac{\quad}{\text{GPM}}$$

Friction Loss for 100 Feet of Pipe

(Hazen-Williams)

$$(Q/C)^{1.852}$$

$$\text{Hf} = 1045 \frac{\quad}{ID^{4.857}}$$

$$\text{Hf} = \text{Friction Loss in Feet of Water (Head)}$$

$$ID = \text{Pipe Inside Diameter}$$

$$C = \text{Pipe Coefficient}$$

$$A) \text{ PVC} = 150$$

$$B) \text{ Aluminum w/ couplers} = 145$$

$$C) \text{ Galvanized Steel} = 140$$

$$D) \text{ Cast Iron} = 100$$

$$Q = \text{Flow in Gallons Per Minute}$$
