For Discussion: Can Technology Detect Who Bows to the Antichrist?

(brandonholthaus.com; August 19, 2026)

<https://brandonholthaus.com/can-technology-detect-who-bows-to-the-antichrist/>

How will the Antichrist use technology to appear to be worthy of worship?

- Omniscience: he will use Artificial Intelligence to sift through all the digital information provided to data centers via our phones and transactions.
- Omnipotence: he will utilize digital payments to have total control over buying & selling (Mark of the Beast)
- Omnipresence: he will employ the Image of the Beast to enforce worship everywhere

How will the Image of the Beast be used to enforce worship of the Antichrist?

Revelation 13:15 – *He was granted power to give breath to the image of the beast, that the image of the beast should both speak and cause as many as would not worship the image of the beast to be killed.*

The Image of the Beast must be widespread and aware enough to know when people were worshipping the Antichrist.

What makes us think there will be multiple images of the Beast?

This “image” will enforce worship of the Antichrist worldwide so they will have to be enough of them to do this.

- If the Antichrist is to be deemed worthy of worship, he will need to be perceived to be omniscient and omnipresent.

What might the Image of the Beast actually be?

An embodied AI android that looks like the Antichrist. Or maybe even just an App on your phone. This brings to mind...

Daniel 3:10 – *everyone who hears the sound of the horn, flute, harp, lyre, and psaltery, in symphony with all kinds of music, shall fall down and worship the gold image*

Satan is not all that creative and will employ the worship strategies he’s used before... as Nebuchadnezzar used an image to test who would worship him, so will the Beast!

What must a person do to demonstrate worship of the Antichrist?

Some ideas that come to mind: bow before the image, salute it and say something like: "Heil Hitler!", "Heil, mein Führer!", or "Sieg Heil!" (meaning "Hail victory!").

- And the system would have to distinguish between approved worshipful actions and obscene gestures.

How will the Image of the Beast know someone is giving the approved worshipful response?

I’ve often thought that a camera will observe and AI would analyze a person’s response.

- I had a customer in Toronto called Gesturetek that used cameras to recognize hand gestures to control computer screens (like in, “Minority Report”).

What would be needed to verify that a person is making a worshipful response behind closed doors?

An article published by TechNext24 examining the privacy implications of 6G technology describes an emerging capability that should get our attention...

- Future wireless networks are being developed not simply to transmit information but to sense the physical environment around them. This is known as Integrated Sensing and Communication, or ISAC.
- The 6G wireless signal used for communications is being developed to function somewhat like radar.
- Signals interact with objects and people, and the system can analyze changes in those signals.
- This communications and sensing technology has already been proven in Wifi routers.

How will 6G cellular also be a sensing network?

Researchers describe future 6G networks as potentially capable of performing localization, activity recognition, and even monitoring certain vital signs.

- And we are not merely talking about recognizing that somebody is in a room.
- Researchers are working on systems capable of recognizing human activities through walls.
- A report on integrated sensing & communications describes 6G capability in which sensing data includes information about a person’s arms and legs, and even heart rate and respiration.

How could a government actually know whether billions of people bowed before an image?

The emerging technology gives us at least a conceivable answer. If wireless sensing can distinguish between standing, sitting, walking, falling, and other body positions and movements, then technologically it is no longer difficult to imagine a future system trained specifically to recognize the physical motion associated with kneeling or bowing.

When will these kinds of 6G capabilities be deployed?

- 2028: Early pre-commercial pilots and demonstrations (such as testing around the Los Angeles Summer Olympics).
- 2029–2031: Initial commercial rollouts and early device availability begin in select markets.
- 2030: Widely anticipated kickoff of true commercial 6G services worldwide.

What is the significance of 2030 in the plans of the globalist elite?

The year 2030 marks the target deadline for the United Nations 2030 Agenda and its 17 Sustainable Development Goals (SDGs).

- The UN adopted this plan in 2015 to end extreme poverty, reduce hunger, improve health, and fight climate change by 2030.

What does the United Nations 2030 Agenda reveal about the mind of the globalist elite?

- Centralized Control: Critics often label the agenda as "globalist" overreach. They point out it imposes technocratic rules from international bodies without local democratic consent.
- Economic Restructuring: Sceptics tie the date to concepts like the World Economic Forum's "Great Reset," promising the elimination of private property and traditional lifestyles
- Conspiracy Claims: Fringe theories frame 2030 as a timeline for a totalitarian "New World Order," with plans for mass surveillance & restricted movement.

How might 2030 fit into a biblical view of eschatology?

As we've discussed in Deep Dives before ("The Midpoint" 2/22/2026) it is likely the Image of the Beast and Mark of the Beast will be deployed around the midpoint of the Tribulation, 3.5 years in. If that happens to coincide with 2030, that would mean the Tribulation would begin sometime in 2027.

- That gets us pre-Trib rapture believers to look up and take notice!

Why do we think that the Image and Mark of the Beast will be introduced at the midpoint of the Tribulation?

Because they are revealed in Revelation 13 which is in the context of:

Revelation 13:5 – he was given a mouth speaking great things and blasphemies, and he was given authority to continue for forty-two months.

42 months is yet another way to say 3.5 years.

What else happens around the midpoint of the Tribulation?

See the Deep Dive from 2/22/2026...

- Satan is booted from heaven
- The Antichrist dies and gets resurrected
- The Two Witnesses are killed and get resurrected
- The False Prophet emerges
- The Image of the Beast is introduced
- The Abomination of Desolation
- The Antichrist initiates genocide against the Jews
- The Mark of the Beast is implemented

What other control mechanism will the Antichrist employ besides the Image of the Beast?

Revelation 13:16-17 – He causes all, both small and great, rich and poor, free and slave, to receive a mark on their right hand or on their foreheads, and that no one may buy or sell except one who has the mark

There will also be the mark of the Beast to control the economy. Only the "approved" citizens demonstrating genuine worship of the Beast will be allowed to take the mark and participate in the economy.

- The mark of the Beast will mean that everyone will have to have a digital identity.
- Thus, the 6G sensing network will also know who it is that is worshipping or not.

Why will the government of the Antichrist need to be totalitarian?

Daniel 7:23 – The fourth beast shall be a fourth kingdom on earth, which shall be different from all other kingdoms, and shall devour the whole earth, trample it and break it in pieces.

Totalitarian control is necessary:

- To demand worship and enforce allegiance
- To control economic life.
- To carry out widespread persecution.
- To unify a global political, economic, and religious system
- To maximize deception and domination.

Not only will the government of the Antichrist have a powerful ruler but it is a system that must reach into every sphere of human life (political, economic, and religious).

Will it be possible to refuse to show allegiance to the Antichrist and remain private?

Through-wall sensing will make it very hard to refuse privately. If radio-frequency systems can identify human activity behind physical barriers, hiding an act of resistance becomes considerably more difficult.

- Those who don't show allegiance to the Antichrist will be considered enemies of the state; they'll be hunted down and killed.

Who will survive the Tribulation?

Survivors will include both Jews and Gentiles. God preserves a Jewish remnant (about one-third of Israel) who will enter the Millennial Kingdom in their mortal bodies.

- Gentile survivors will include unbelievers who will be identified as "goats" to be cast into Hades due to the sheep and goat judgment.
- The Gentile believing "sheep" who survive will help to repopulate the earth during the Millennium.

What does it tell us that we are seeing technologies converge to make Revelation 13 plausible?

The Bible never says the Antichrist uses 6G, artificial intelligence, radar sensing, or implanted microchips to accomplish this.

- For the first time in history, we can see technologies capable of producing this level of automated surveillance and enforcement are becoming plausible.

Dr. John Walvoord used to explain it this way: When you see Christmas decorations going up in the stores, you know Thanksgiving is near.

- In the same way, when we see the stage being set for the Tribulation, we know the Rapture is drawing near.
- The Rapture itself is a sign-less, imminent event. However, we can see the conditions developing for the Tribulation, and we know that the Rapture is promised to occur prior to Daniel's 70th Week.

What gives us a sense that the rapture could be close?

As we see the technological, political, economic, and religious framework of the Tribulation increasingly taking shape, it reminds us just how close the Rapture could be.

Luke 21:28 – Now when these things begin to happen, look up and lift up your heads, because your redemption draws near.

What applications do we see from our discussion today?

- 6G sensing technology will likely be used by the Antichrist to verify who is really worshiping him.
- The closeness of this technology reveals how close we must be to the mid-point of the Tribulation
