For Discussion: The New Censorship: AI Will Decide What You Are Allowed To Know

(prophecynewswatch.com; August 7, 2026)

https://www.prophecynewswatch.com/article.cfm?recent_news_id=10361

What is the prophetic significance of Artificial Intelligence?

- It will enable the Antichrist to appear to be omniscient in knowing everything there is to know about people.
- Embodied AI will enable the Antichrist to appear to be omnipresent through the image of the Beast.
- It will enable the Antichrist to appear to be omnipotent in being able to persuade people through AI-generated content and censorship.

Why is censorship so powerful in persuading people?

Because it controls what people see, hear, and therefore come to believe.

- If only one view is allowed and it's repeated everywhere, people begin to accept it as fact.
- When contrary voices are pushed out, there's nothing left to counter the message.

Who controls the media/information gateways of the world?

Ultimately it is Satan who is inspiring the talking points of the world's narratives...

Ephesians 2:2 – you once walked according to the course of this world, according to the prince of the power of the air, the spirit who now works in the sons of disobedience

The title "*prince of the power of the air*," refers to more than just the physical place where he operates, it also refers to his spiritual influence over the airwaves, the communications humanity uses.

How will AI be used to impose censorship?

AI has effectively replaced search as the way people find information on the Internet. AI is programmed as to what sources are to be used and when certain "unreliable" sources are excluded, they are effectively censored... and the users don't even know it.

- That is the new censorship: not erasing information, but ensuring that people never discover it exists.

How is AI censorship way more effective than traditional censorship?

Traditional censorship is visible. A book is removed. A speaker is silenced. A website is blocked. People can see what happened and fight back.

- AI censorship can be almost invisible.

Where have we seen AI censorship at work?

On June 23, NewsGuard launched an AI news service that draws its answers exclusively from 12,000 publishers the company has approved as reliable.

- NewsGuard describes its standards as transparent and apolitical.
- But PragerU CEO Marissa Streit is warning that the system cannot help but apply ideological filtering treating conservative sources as misinformation.

Why couldn't NewsGuard apply genuine apolitical criteria in their AI service?

The criteria NewsGuard uses still require human judgment. A system can call itself neutral while still reflecting the worldview of the people operating it.

Why should our recent Covid experiences make us skeptical of establishing information gate keepers?

Official narratives change. Experts disagree. Supposedly settled debates reopen. Claims once dismissed as irresponsible can later become legitimate subjects of public discussion.

How has our culture turned journalism into more of a source of propaganda?

"Freedom of the press" originally meant that the press will tell us the truth even if the government opposes that truth.

- Evidently, "freedom of the press" now means that the press is free to warp the news until it will influence their listeners to the outlet's preferred viewpoint.

Do people realize that most news today is propaganda?

No... most people do not recognize the propaganda that is masquerading as news.

- Even worse yet, many people do not care.

Why is a person's perspective about propaganda ultimately a spiritual issue?

- God is true and every man a liar (Romans 3:4).
- God's Word is truth (Psalm 119:160; John 17:17).
- God does not lie (Numbers 23:19; Titus 1:2; Hebrews 6:18).

We are all, to a certain extent, brainwashed by the content we expose ourselves to. Remember this — the truth of God's Word is the only “brainwashing” that helps us...

Romans 12:2 – *do not be conformed to this world, but be transformed by the renewing of your mind, that you may prove what is that good and acceptable and perfect will of God*

Why would AI censorship be especially serious in education?

Students once learned research by examining different sources, identifying bias, comparing evidence, and defending their conclusions. Under the emerging model, they may simply ask an AI system for "the truth" and accept whatever approved answer appears.

- That is not critical thinking. It is intellectual dependency.

How is AI censorship in the spirit of Antichrist?

Christian perspectives are particularly vulnerable because many of today's greatest disputes are conflicts between worldviews.

- Questions about abortion, gender, marriage, sexuality, parental authority, religious liberty, Israel, and the authority of Scripture cannot be separated from moral assumptions.
- Yet AI systems can present secular progressive assumptions as neutral expertise while describing biblical conclusions as partisan, controversial, or unreliable.

How will AI censorship effectively destroy the Internet as a source of alternate news?

Approved publications will be cited by AI, receive traffic, gain legitimacy, and share in new revenue.

- Disapproved outlets may technically remain free to publish, but their reach could collapse as AI becomes the primary way people find information.

How will AI censorship wield extraordinary power?

When one system becomes the teacher, librarian, search engine, news editor, and fact-checker at the same time, its creators possess extraordinary power over the public mind.

- The danger is not merely that AI may lie.
- The greater danger is that it will deliver a filtered version of reality, and convince people that no other version ever existed.

What does the Bible say about the role of propaganda in the end times?

It will be as a birth pang, growing in frequency and intensity...

2 Timothy 3:13 – *evil men and impostors will grow worse and worse, deceiving and being deceived*

What did Jesus say about the role of deception indicating His soon return?

He warned us to “take heed that no one deceives you” (Matthew 24:4) and that:

Matthew 24:24 – *false christs and false prophets will rise and show great signs and wonders to deceive, if possible, even the elect*

How will today's global communications make control of the whole world possible?

Revelation 11 describes how “*the peoples, tribes, tongues, and nations*” (the whole world) will witness the death and resurrection of God's two witnesses in Jerusalem.

- That reality means propaganda can be broadcast and amplified like never before.

How does turning away from God make people more vulnerable to propaganda?

2 Peter 3:3 – *Know this first of all, that in the last days mockers will come with [their] mocking, following after their own lusts*

People who follow their own lusts will be persuaded by flattering or deceptive messages that reinforce worldly desires rather than call people to repentance.

What is the best defense for not being vulnerable to propaganda?

To be closer to the Truth, having a growing relationship to Jesus so that...

Ephesians 4:14 – *we should no longer be children, tossed to and fro and carried about with every wind of doctrine, by the trickery of men, in the cunning craftiness of deceitful plotting*

How should Christians respond to the growing effectiveness of propaganda?

- Hold fast to Scripture as the ultimate authority and test every message by the Word.
- Expect opposition and persecution; prepare spiritually to endure.
- Keep proclaiming the gospel faithfully—our mission continues even as deception grows.

What application do we see from our discussion today?

AI censorship and propaganda will give the Antichrist power over the masses. We have to be close to his coming.
