

Alexandria

Women's Metal
Colors: Black, Wine

EYE	DBL	TEMPLE
51	17	135mm

A classic look in a memory metal material. The **Alexandria** features two tasteful colors of **Black** and **Wine** combined with tasteful **accent pieces on the frame front and temples**. A deep "B" will accommodate a **full progressive lens**, which is not often the case with a small 51mm eye size.

Gayle

Women's Metal
Colors: Brown, Lilac

EYE	DBL	TEMPLE
53	17	135mm

The first thing that nearly everyone says when they see the new **Gayle** frame is: "What a cool, different and interesting shape." The word everyone will say after trying the style on is "flattering". Available in both **Brown** and **Lilac**, this frame will pop on your frame boards as it is very unlikely that you have this shape by anyone else.

Hayes

Men's Metal
Colors: Brown, Shiny Grey

EYE	DBL	TEMPLE
52	18	140mm

The Hayes offers a **vintage look but in a new memory metal material**. Ideal for the larger man who wants the classic P3 or round frame shape but needs a wider front. While listed as 52 eye, this frame fits as a 56 eye due to the placement of the temples. Most every store/practice has a customer/patient who would love this look now that it is made in a larger size.

Linstead

Men's Metal
Colors: Gold, Matte Grey

EYE	DBL	TEMPLE
53	17	140mm

A modified, updated double bar men's aviator. We have been getting requests for this type of frame from the past year and so here he is. **A very deep "B" for the larger man** and colors that appeal to the 50+ something demographic, **Gold** and **Matte Grey**. Upgrade your patients who are wearing these old versions to one in memory metal/twist titanium.
